

**Izzo Alex PID Plus**, with its beautifully-moulded 304 stainless steel heat-protective body panels, features a commercial rotary pump that delivers an ideal & completely stable brew pressure and is more durable & quieter than domestic vibration pumps; a P.I.D. (with integr-

ated shot timer) allows you to adjust steam pressure and brew temperature exactly to your liking; the cool-touch steam wand (with 4 different steam tips to choose from) delivers powerful simultaneous steam.

**Alex** utilizes industrial-grade components and best-designed internal layout of any E61 semi-commercial machine, and even includes a conversion kit if you decide to run a direct water-line and/or drainage like a commercial machine.

Our **Zuccarini** group temperature modification performed at the factory in Italy prevents the cooling flushes required on other traditional E61 machines, delivering stable, consistent temperature in the brew group (adjustable via the integrated P.I.D.). This allows for creamy espresso brewed at a temperature you can modify, without continually flushing the group.

**Available in 3 finishes** (mirror-finish steel, matte white or black) and a selection of standard or optional accents (black, white, red, or wood knobs & portafilters).

Canada's original importer of fine italian espresso  
equipment for home, office & commercial use — since 1954

## Key Features:

- 2 x 58mm ergonomic commercial brass portafilters, professional metal hand tamper, and E61 group with PID and **Zuccarini custom mod** for rich, hot espresso
- **Lever valve system** instantly releases pressure from group for dry coffee pucks and fast re-use
- Full-motion, multi-jet, "**cool-touch**" **stainless steel steam wand** with 4 different steam tip styles, for fast micro-foamed milk at the same time as you are brewing your espresso
- **Large 2-litre 1350 watt copper & brass boiler** for abundant steam pressure and instant boiling water
- **Commercial rotary pump** is fully adjustable, quiet, and long-lasting, and delivers perfectly consistent water pressure to group
- **Dual pressure gauges** measure steam and pump pressure for monitoring your machine and usage
- **Self-priming boiler** with a 3-litre water reservoir with safety shut-off, or install to a direct water line
- Includes **blind filter for backflushing**, group cleaning brush, barista towel, custom machine cover, and adjustable feet to slightly raise or level machine

**Specs:** height: 41cm/16.25"  
width: 37cm/14.5"  
depth: 44cm/17.25"
