

Simonelli G6o Digital Grinder

Description

Nuova Simonelli G6o is a compact but fully commercial-grade on-demand grinder for home, office or light commercial use, available in a matte black finish. G6o's programmable dose settings (for a single or double shot, as well as manual) are easily adjusted "on the fly", and its doser-less design allows you to grind coffee directly into your portafilter in a near-perfect cone, reducing spillage and minimizing the amount of coffee grounds left-over between shots.

A powerful commercial motor, large 60mm burrs, micrometric grind adjustments (to dial in that perfect grind), and commercial-style hopper complete the package.

Specs

Burrs: 60mm | **Bean Hopper:** 340g removable with closer

Finish: stainless steel front with matte black metal body

Height: 41cm/16" | **Width:** 18cm/7" | **Depth:** 27cm/10.5"
